Trade Protectionism and Its Methods

- 1 Smoot-Hawley Tariff of 1930**
 It was designed to protect farmers from agricultural imports from Europe.
- 2 When the government subsidizes local industries**
 That allows producers to lower the price of local goods and services.
- 3 Impose quotas on imported goods**
 No matter how low a foreign country sets the price through subsidies, it can't ship more goods.
- 4 Deliberate attempt by a country to lower its currency value**
 This would make its exports cheaper and more competitive.
