Touch the notification to view the details and approve the request. Android has been around for more than a year, and at that moment the developers whiped some large apps. Whether you are a new Android owner or a pro looking for new tools, these 10 fantastic and free apps belong to your Arsenal.Photo of Lwallenstein. To jump immediately above the apps that are so common, universal, and well replicated on the iPhone or other mobile platforms that a user with a need probably we can do - Facebook, Yelp, Evernote, remembers milk and endless twitter clients, Widget and app. We also skipped on Google's ordered apps, like Google Voice, navigation and glasses, which are (or will) included the standard on new Android phones. Instead, we are aiming to shine a small light on apps that can easily offer excellent functionality for those who download them.Update: I moved taskiller for free up to a lower ranking, and modify its entry description a little, after some more Searches, off from some comments and emails Andro-savvy.10. Layarin Some ways, this is a vote for the potential of layar as much as the practical application. Walking through your phone and see Wikipedia's subjects, apartments for sale and what Twitter users have delighted through your phone is a rather accurate thing, and potentially useful when you're looking for things to do in a new city. But as Layar continues to add new levels, and how the camera and mobile processing power continue to improve, Layar could become much more interesting than already. One thing worth remembering is that if you don't like the view of the 3D camera, or as the appearance of yourself while you use it, Layar can only show the points of interest on a Google type map. Anyway that you use it, it's an intriguing aspect to what is happening around the corner. Listening to the last update. we couldn't really call to listen to a king among the podcast apps ... had some irksome bugs, one of them is the loss of episodes and sometimes subscriptions. Now, though, your Google app does a great job not only to find audio content, but export your inscriptions to manage in Google Reader, guaranteeing a complete and easier backup feed the recovery of past episodes that you want back your head and feel. If you need a fine fine grain podcast control. Acast test, but listen to most. Anycutyou can drop a lot of wonderful things on the home screen of Android, but I can't get access with a click to everything in the phone settings and extras. Anycut does not have an excellent interface, and it may require some process and error before arriving exactly what you are looking for. Soon, though, you will have access to the deeper bowels of the settings, so the 3G passage and switching off, allowing location services, and other tricks are easy to pull out. FreeThe As Desside tariller at Android multi-tasking is that at times, some apps can become unexpectedly become magni of memory or bandwidth or bring the phone with them when they lock. A few apps provide a direct and simple "chit" option, however, and sometimes you can't get to the app to close it. Enter taskiller, a free app murder utility that works from its standard icon, or as a series of numerous widgets you can add to the home screen to save the system with a single click. The free version serves advertisements and lacks some advanced features, but generally serves the needs of anyone who tires you to need to actually reset the phone just to clarify space for, know, phone calls and such. Note: This app must be used as more than a last resort than the regular maintenance tool, killing processes and Willy-Nilly apps can disable alarms, kill background synchronization and have other non-intentional consequences.5. Slidescreenyou uses your Android smartphone differently from your desktop computer. Don't work with files and shortcuts, so that check-in on data flows that interests you - E-mail, text messages, Facebook and Twitter, chats and the like. Slidescreen replaces, or simply increasing, if you wish, the main phone screen, creating line after the message line and feed. Slide the central information bar upwards and down to look more or less of your items, scroll right to dismiss items like beds and finish having all your data on your hand at once. Slidescreen also replaces the standard application tray, offering 8 slots to put your apps most frequently accessible and tuck up all the others in a rolling bridge below. It's a total makeover for your phone, in other words - one that could simply make you fall in love with the concept of mobile data. Shoperokay, at the beginning we were rather skeptical of the application of Google's Shopper, since it only seemed a mashup of his Google glasses and Google's smart-smart apps like Shopsavvy. Then we actually used the shopper, and we were amazed both from what is accurately considered both barcodes and simple hedging shots, and how much it worked very quickly. It turns out, according to a developer who appeared in this week in Google, shopper is actually loading the image data on Google servers as it captures and decodes the barcode on the phone. The speed for the speed sake is beautiful, of course, but it's nice enough not to have to stand in front of a display of a book for a whole two minutes, waving the phone around a group of books you are trying to do the competitive price. The buyer answers the question "I can buy this cheapest", and responds quickly.Android: Google has already got got glasses for visual search and the Google Shopper's mobile site can be run ...
