They work according to a possible principle such as pregnancy tests. If viruses are contained in the sample, the protein components of the virus react with the test strip. In order for an antigen test to show a positive result, a large amount of virus is none compared to the PCR test. No laboratory is needed for the evaluation. One result is à € "Depending on the manufacturer" à € EN 15 to 30 minutes. Self-tests are also an antigen rapid tests from the work. They are free and can also be used safely by untrained people after instructions for use. For this, the sampling and evaluation must be simple. The test can be carried out, for example, with a nose smear or with saliva. How meaningful are the Corona tests? PCR tests offer the most reliable results à € "You are the à € ZGoldStandardà € under the Corona tests. The sampling is carried out by medical staff, the evaluation by laboratories. In comparison, rapid tests recognize infected people and not infected people worse. However, you get the security in Corona pandemic and offer additional security with contacts: With a negative result, you cannot infect anyone in the next few hours. After a quick test à € "For example when visiting a clinic", the AHA rules should continue to be observed. After a positive certified antigen rapid test, there is a right to a PCR test. If you do a self-test, you should make sure that the test that the minimum criteria will find out that the Paul-Ehrlich-Institut (PEI) has set together with the Robert Koch Institute. In principle, serious tests are on the imprint on the special approval of the Federal Institute for Medicines and (Bfarm) and/or a CE marking with a four-digit identification number of the named area as well as a German-language use information. You can find a list of tests on the website of the Federal Institute for Medicines and Medical Devices (BFARM). You can read more about Corona tests at www.bondenkuntona.de or at the Federal Ministry for Health. Source: Federal Ministry for Health/Press and Information Office of the Federal Government The decision as to whether a Corona test is free of charge can be made from the type of test. A distinction is made between the PCR tests from the laboratory, the antigen fast tests (must be carried out by the specialist staff) and the self-tests for home. The deciding on whether the PCR test is carried out only makes the treating doctor. According to the Robert Koch Institute, those affected are tested to the group of welcome suspicion. If the doctor does a test, the TK takes on the laboratory costs of EUR 27.30 per analysis - for insured persons, there are no additional costs. The test is billed over the insurance card. If you have symptoms, please contact your home practice by phone. Even before the test result is present, those affected should insulate themselves. Free test offers can only be used by a followed person. For this purpose, for example: à € children up to 5 years, à € pregnant women in the first trimester who have not yet been vaccinated, à € People who visit a hospital or a nursing home, à € Housekeeping of infected, à € residents of institutions Dershine These costs are borne directly by the federal government. For example, you have a red tile in the Or do an event on an inner visit? Then I would have to participate in the costs with 3 euros. A reimbursement of costs by TK is not possible. A test is required, this can be carried out shortly before or when you enter the hospital. If an admission is taken, the costs can be billed with the hospital on the insurance card. There are no additional costs for them. There are also people who are currently being treated in the hospital and where an infection occurs can be tested in the clinic. A test can also be performed regardless of the infections that have occurred if it establishes the concept of closing test. Here, they also do not incur any additional cost. The test is carried out, for example, in the same trial centers, ma "dicas or pharmacies. During the stay, the test can be repeated once. These tests are free for you. The following applies to PKV insured, for example, for your private insured child with a mother-child card that we approve. A reimbursement of tk costs is not possible, also, also for self -procurement or private payment. COVID -19 - Share your experiences and get valuable advice. There are also test options in many flight horses à © DPA/Robin is Corona-Tests im europäischen ausland gibt, und was sie kosten, dñenmark überall viele testmöglichkeiten vorhanden hier finden Sie einen Überblick der testmöglichkeiten und kosten in den wichtigsten reiseländern in Europa: I'm sorry, 47 euro; a flughafen zum teil deutlich teurer Test-Orte in griechenland: testmöglichkeiten gibt es in allen größeren städten, auf den meisten inseln, z.B. kreta, mykonos, rhodos oder saronica sowie an den flughäfen in dänemark: Costs for fast and PCR testing Test costs: antigen speed tests can be obtained for max. 15 euros, the PCR tests cost from 50 to 120 euros, prices can be used in Italy depending on the region: in UES ÁAFliche and private facilities: in pharmacy, you will find a view of the test in Italy*Croatia: Costs for fast test and PCR Test costs: Quick antigen test Aprox. 13 to 40 euros, PCR test approximately 40 to 133 Eurotest locations in Croatia: there is more than the 350-way test stations across the country, which are also accessible to tourists here, you will find a look at all test options in Croatia* (PDF) Costs for fast test and PCR Test costs: Quick antigen test Aprox. 13 to 40 euros, PCR test approximately 40 to 95 Eurotest locations in the Netherlands: there are test centers throughout the country, especially in ADAC limit, there is no general view of the test stations in the Netherlands, you can find a look at all test options in the Netherlands* (PDF) Costs for fast test and PCR Test costs: Quick antigen test Aprox. 13 to 40 euros, PCR test approximately 40 to 50 euros, PCR test approximately 40 to 75 euros, PCR test approximately 40 to 100 euros, PCR test approximately 40 to 130 euros, PCR test approximately 40 to 150 euros, PCR test
