Here, you have two options. Without it, the pen does not work as an agreement. After this, you should check the storage. Once you get the charging pen, you can go to the next step to make the pen to work exactly the way you want it. When it's not unbox, make sure you connect it in your computer's USB port and upload it. If you want your pen to be completely turned off, you need to hold down the button for at least 6 seconds and the spy pen will be completely deactivated. If you simply want to take pictures with your spy pen, then everything you have to do is make sure that the pen is turned on and click on the On / Off button once and the light will flash that you took the image that you wanted. Anyway it works well and your pen will be ready for the next use. This step is for the most advanced bunch that you want to put a date to all your information on the microSD card or you want to change the date on the card, so everything you need to do is connect your spy pen to your computer and you will find a Time.txt file and with this file, you can change the time and date inside the file and then save it after having done it. After connecting the USB cable to the pen and then to the computer, wait for the microSD to be presented to the computer and double-click it. It is due to the system difference or computer difference. You must have the microSD card for the pen to work. Just remove the memory card and insert it into a card reader. It really is so simple. View all the videos and images you took with your Penonce Spy you caught some photos and videos, of course, you would like to see them again and look what you captured. However, most will keep the same USB concepts and click on and off. More reading erovaf erovaf rep lacitcatsdiK yps rep enneP rep neP yps .ediUG Do not use it in the strong magnetic place Please do not use it in the strong electric place Other:for more information, please contact your local dealers Get the PDF instruction file here Download the drivers here WhatÅyou finally bought that spy camera pen that Å Å you are looking at for a long time, but notÅÅget any spy pen instructions to go with the pen. These features will give you a reasonable use, especially for Reporter, Emergency Recording, Action Camera, Home Security, Tourist Recording etc. Please also remember that most spy pens use these instructions, however they will differ from some spy pens in the market that are created slightly differently. Now Å Å the time to do it and to do it, Å Å you need to click on the top of the pen just as you would use any regular pen and you are on your way to becoming Tom Cruise in Mission Impossible! Once you have clicked the button at the top of the pen you should see a light that will tell you that the pen is turned on properly and you are good to go.Once you haveÅÅturned on, there are two options. The mode recording device has been started because the indicator light starts flashing to indicate that it is in when you are ready to stop the mode recording device, click the button used to turn on the pen and the registration, which will be So off. On the other hand, others will require you to hold down the same button for a couple of seconds after ÅÅ turned on the pen, and only thenÅÅ will start recording. With this tutorial, the GadgetsSpy Team will give you the instructions of the spy camera pen that you need to go on the way to use this pen exactly as you want at any time you need it to do that if you wish. You'll lose some footage, but keep the latest footage you need. If you want to see all the data you took with your pen You need to connect the pen to the USB port is displayed and then connect it to the computer. What should I do when there are no feedback from my camera for more than 2 minutes? Once you do, you will open all the contents that have been saved in the microSD and you can see all the videos and images you have taken with your spy pen. Whatever, it's a rather simple thing to do, and you haven't had any problems with it. If you want to start recording from your pen you have to keep the same button you used to turn on the pen for 2 or 3 seconds that then starts the spy pen registration mode. Lighting: Please be sure of the sufficient light, but do not tackle the strong light face to face, space: please do not use it in a very dirty place. ResponseÅ ÅÅÅÅÅ Please restore the camera by inserting the button mode from M to L, then turn on again. If you don't have before please, go ahead and click here for the best Spy Guide Guide. Before things, you need to make sure that
