# All apps download pending

Why do all my apps say download pending.

By Mely Parker I Justin Sullivan / Getty Images News / Getty Images When downloading Apps for iPhone from Apple's App Store, the time required for downloading to be transferred depends on the speed of your connection and the size of the app. Small apps can almost instantly download, while larger ones require more time. Maximize your download speed to get the app installed on your iPhone and ready to use. The type of connection you played an important role in order to download fast content on your iPhone or computer. A quick 4G connection to New York City downloads much fastest than a weak 3G signal in the woods. A high speed Wi-Fi connection downloads even more quickly than 4G, allowing you to get your app over time as fast as possible. The size of the app is a factor in the speed speed on your iPhone. The apps that are graphic or heavy video (or who come with a lot of content) will take longer to download than small text-based applications. Plan to be on a quick connection and have some free time if, for example, you are downloading a map pack for a GPS app. For fastest file transfers, wait until you are on a fastest connection and then download the IOS apps. Unless you ever need an app immediately, you can save valuable time postponing the downloads larger until you have found a Wi-Fi hotspot or you have access to your high speed internet connection at home. The opinions expressed by the contributors of the entrepreneur are his own. You are reading US entrepreneurs, an international franchise of media entrepreneurs. Many startups spend enormous sums of money for advertising, but neglect the optimization of the App Store. App Store's optimization is the most convenient method to organically increase your installations for a couple of reasons: Shutterstock according to Forrester, a 63 percent staggering of all apps installments come from General Browsing in the App Store. Optimizing your app to be discovered through research, â, you can drastically increase the number of downloads you receive for your mobile app. If you have a solid Optimization strategy of the App Store and run correctly, you will receive tons of organic and free installations to your App.Here are some suggestions and tricks: Â, 1. Choose the right title. The title of your app ranks more heavily than the rest of the meta-data, so choosing it wisely. Make sure you direct words in your title you want to hit more, words of which you are confident. The tools like sensortowerÂ¢ and applications can provide accurate volumes of traffic and difficulty of certain keywords. Also, make sure you are not the keyword stuff the title; The App Store will reject your App.Realed: How can the app improve revenue and store users committed? Depending on how many downloads and what traffic your app is already getting, you need to adjust the keywords. For example, if your app is already becoming high traffic and download, you can direct more competitive keywords that have higher traffic. If you are just starting an app that nobody knows, it is not present, I recommend choosing keywords that have a low-level difficulty level and medium traffic (based on analytical tools such as sensortower or applications). There are probably some keywords that are gems that others do not aim and may have decent traffic.3. Location by country. At each App Store is separated geographically by country, it is really wise to locate your app to optimize it for discovering in different languages. The App Store allows you to modify the meta-data within your app depending on the country in search Your app. Some companies have used a mixture of Google Translator and mother tongue to help locate their apps, so it shouldn't be too difficult for you to locate as well. Location is a huge aspect of having an effective global presence. Think of all these unpleasant markets that you can reach and how easily you could acquire more users with these markets. Â, Related: the first 5 myths of mobile apps - and because believing that they will hurt badly Business4. Use powerful images and a formulation. People are able to discover your app, the rest is up to how well your app list converts to download. To optimize conversions, you need to use beautiful images to attract users to desire to download your app. Make sure you include the most attractive aspects of your APP and also include captions in images. You are surprised to be surprised as a simple tweak or word can translate in terms of conversion percentages.5. Pay attention to evaluations, reviews and description. When was the last time you downloaded an app with a star? Evaluations and reviews do not make the factor so much to find out how the keywords and title, but have a huge impact on conversion rates. Users are probably more likely to download your app if you have received a large number of positive reviews. Make sure you also include an interesting and tempting description to explain to users what your app does! Related: 10 steps to build an app, people will adore6. Follow the optimization of the Data.app store is a process in progress that requires experience, time and test to be right. Make sure you accurately test the keywords for periods of time, and even test the images / description of your app to see what the conversion of the best.Â¢ at the end of the day, the data do not lie, then make sure you follow the Data and find out what works specifically for your app. Photo of courtesy: Future Publishing / Getty Images If you have a new phone, tablet or computer, you are probably trying to download some new apps to make the most of your new technology. Short to Â¢ â,¬ â "Application", the apps allow you to do everything from listening to music to synchronize your phone to your car to play. With so many apps to choose, however, it can be a bit daunting If you don't know how to download them. Fortunately, the app download can be fast, simple and easy regardless of the type of technology you are using. Read on to learn how and where to download app. When you download a file on the network, either from A store or elsewhere, a file hosted on an online server is copied to the computer. If you have never been online, both on a phone or computer, you probably already downloaded the files on many occasions. The apps are not different Â¢ Â , ¬ "They are only specific types of files that drains from the Internet. Courtesy Photo: Scott Barbour / Getty Images apps are generally configured as executable files (.exe), although the apps think for Apple devices are often available as a file app (.app) or DMG (.dmg). Sometimes (especially when it is designed for computers), an app is compressed in a zip (.zip or .zipx) file to save space. To do this, you may need another program, like WinZip or 7-Zip, to open it, even if you might even be able to open it from the left or by right-clicking if the device has arrived with the Possibility to open zip files. In many cases, however, the download of an app is as simple as by clicking a button on the app page. As long as it is not enough space on your device, the app will probably be ready for use once the download was done. Android is an operating system used for phones, tablets and more. The odds are that if your phone is not an iPhone, it is probably probably an Android device Â¢ â,¬ "The brands include Samsung, Huawei, LG, Motorola, ZTE and many others. To download app for an Android device , You can visit the Android website or use the Google Play app. (It is often pre-installed on phones and tablets, so you may already have it.) Be aware of the fact that you may have probably requested Log in with your Google account or create one if you don't already have it. Photo of courtesy: SOPA Pictures / Getty Images Open the Google Play store on your device and then look for the specific name of the app or any larger category you may interest you. Click on the APP result to learn more. If the app is free, it should start downloading; Otherwise, you will be asked to pay it. In both cases, once the file is downloaded, it is good to a Microsoft Host Apps on your website, which can be accessed via any device with a web browser. You can use the site to download app for tablets, computers, phones, Xbox console, virtual reality set and more, so it's Important to check the system requirements on the page of each app to ensure that the app is compatible with your device. Photo of courtesy: Kim Kulish / Getty Images Select any free or paid app is interested in seeing a brief description of the app. If you choose a paid app, you will be asked to enter credit card information or a gift card to complete your order. Apple App Store hosts apps designed for iPhone, iPad and other Apple devices. As with Google Play, it is often pre-installed on telephones. Like other app stores, allows you to filter the apps by category, including apps in the foreground, new app apps, popular apps, theme categories and more. Choose the app you want and follow the on-screen instructions to download it to your device. You will need to access or create an account completing the purchase.
