I've been searching for a free luckperms permissions.yml for essentialsX All Ii could find was an old deprecated permissionsex permissions.yml for essentials I've tried to modify it, but it doesn't work well. I cant op without console, and inheritance isn't working, and I can sethome inside of spawn that I set with world-guard. Can anyone share with me a free luckperms permissions.yml for essentials? perhaps the one that you use? or at least help me get inheritance working. Or maybe I'm making other mistakes that I don't know about. Help me out please!
