So, if this is the question in your mind then here is the simple answer for that. Just Linux or macOS, Windows is not totally free for everyone. However, it costs an amount of money to purchase its license key in case a user wants its full features and uses it for the rest of their life.I hope now you have understood why it is necessary to have this key since this Operating System comes with the 30-days of a free trial.After this time period ends you will face many restrictions like you cannot change the theme, don't receive OTA updates, will see an annoying activation watermark on screen, and many more.This is the only reason why we need this license so we can enjoy using every feature of this Operating System without any restriction.However, you may also find many fake licenses around the internet that only last for 45-days only but here you will get 100% genuine and permanent ones.Windows 10 Pro Product Key FreeThis operating system comes with various editions like Home, Basic, Pro, Enterprise, and so on. All these are the same but some of them come with restrictions or fewer features. For example, in the Pro edition of Windows 10, you will get the feature of Bitlocker while in the Home edition it is not available there.Similarly, there are various features that we can do with the Pro edition as compared to the Home edition. Even though the product key for each separate edition is different. If you use the license of a Home or a Basic on Pro edition you will get an Invalid key error.This is the reason why we should always use a key with the compatible Windows edition. Ok, so below are the license keys that we can use on our Pro edition in both x32-bit and x64-bit.Windows 10 Pro Product Key 64bitW269N-WFGWX-YVC9B-4J6C9-T83GXVK7JG-NPHTM-C97JM-9MPGT-3V66T6P99N-YF42M-TPGBG-9VMJP-YKHCF8N67H-M3CY9-QT7C4-2TR7M-TXYCVYTYG9-FR8RD-QBQC8-HC7J2-2JJFFMH37W-N47XK-V7XM9-C7227-GCQG9Windows 10 Home Product Key FreeThis is another build for Windows 10 which is developed to use on Home computers and it doesn't have all the features we use in the Pro edition.
