# Placement guide for tape in hair extensions

How to apply tape in hair extensions step by step. How to add tape to hair extensions.

Typically a long bob is 10 inches, shoulder-length hair is 14 inches, and 18-20 inches will land at mid to lower back length. Below is a DIY guide for beginners, with tips and tricks to make your hair life more exciting and salon needed. The hair can be reused if you remove the adhesive and apply new adhesive strips to the hair wefts. As a result, I've alternated between crochet braiding for the last ten years when I want my natural texture and tape-in extensions when I want straight hair for a spell. When you research tape-in human hair extensions, the number one piece of advice you'll find online is to go to a professional because you can't possibly perform this task well yourself. The first time: Add volume and/or color, not length. Then, drag a thin line of hair the width of the extension pieces with a bobby pin, comb, or other thin points such as a long tail brush. Because there was no hair available in the pinky-peach fashion color I am presently sporting, I purchased color 613 (platinum blonde). My adventures began in high school when I gave myself a full set of box braids with embroidery thread leftover from my days making friendship bracelets. Amazon is the easiest place, with the broadest selection of choices. Ariane Resnick/Design by Cristina Cianci Step 2: Until you are well experienced with extension placement, this additional step is necessary. By far, the process is the simplest of all semi-permanent extensions but, like anything, can be damaging if you do it incorrectly. Adding length will potentially require cutting, which is actually pretty easy once you've mastered the tape in the installation process, but you don't want to start out trying to tackle both of those things. Purchasing hair: Choose extension length based on your own hair length (you can measure it with a tape measure). If you want volume and color, choose a color that isn't your own but will pair well, such as a Mix if you have a natural brown hair or jewelry tones for natural black hair. If you have perfect wave curls, you are safe from getting curly. Oils are Kryptonite for adhesive. Treat not to wash or wet hair more than every few days. The tape in each extension is facing internally, which means that the hair is stuck both at your own hair as itself. In addition, the installation of its own extensions gives you the freedom to change color without damaging your own hair, helps you disguise the incommensurate growth phases, and gives you the pleasure of long hair without a long-term commitment, all to a small fraction of professional cost. You will find that extensions absorb oil, so you do not need to wash as often. Please note that your washing days will be particularly spongy and photographic activities / opportunities accordingly. Rub at the extending sandwich raises, pushing with your fingers to separate the sandwich, and gently remove the extensions. The act of installing adhesive tapes, which we will review thoroughly, consists of walling two pieces of extension between pieces of your own hair. This ensures that you know 100% how the extension will be seen. Remove the Bobby pins and shake your hair around to make sure the extension sandwich sits naturally. If you want to add volume only, choose your exact hair color. And it is not so much the installation of adhesive tapes, which requires delicacy, but where they place them and how to treat their own hair so that they mix as best as possible. Bobby pinches hair tightly. Fortunately, you do not need to pay attention to that advice because I am here to tell you how to make DIY cassettes safely so that they look very good, last a while, and at all of 10% of what you would pay in a salon. Next, release the bobby's hair on the extension and let it fall. Ariane Resnick/Design by Cristina Cianci Step 3: Remove the adhesive from both extensions. Step 4: Place an extension under your hair strip, from the 4th to the 4th onamuh olebac ed senoisnetxe sal euq odibeD .orenid ochum ratsag nedeup sodot on euq odneitne euqrop ogah ol etnemlamron euq lairoat etse arap otarab sAm olep etnemlanoincnetni ©ArpmoC .odreiuqzi odal le ne roitrefni etrap al ed acrec saralc sAm sazeip sal euq laugi la .senoisnetxe nos ajero im ed ojabad azebac im ed ochered odal le ne sev euq olebac le odot isac .lanif negami al ed sotof sod sal ne euq AsA .nAicacoloc al ne latot aznaifnoc sagnet euq atsah olasA euq Asa .serapmi senoiacoloc o serorre jArative ybbob nip led acitcArp ed osap IE .jAres elbisiv sAm .abirra sAm ot nauC .somersiver ol nAibmat .otseupus roP .ed otcepsa le etsug el euq ragul nu ne nAise senoisnetxe sal euq atsah sosap soremirp sod sotsa atipet .ohcefsitas jAtse on is .oidem le ne oirascen aes odnauc oces Apmahc esu .ragul us nE .sirroN ocIN rodacude le y cinaP cinaM ed rodajabme le .oreuqlep le rop sodaborpa odis nah sojesnoc sotsE .zAar al ne olebac us ed art al a nAisenetxe ed sazeip sod odnaruges nAicacoloc ed acitcArp al arap ybbob rodasap nu ocilatu .nAisenetxe al ne rapet etnemlaer ed setna .osonimulov yum ev es erpmeis aAd remirp le .senoisnetxe sal sahcalp is osulcni .neparta ol euq rative arap ose ed ojabad olep le avalc ybbob .oidemorp anosrep al euq sAm ohcum .a-Agolotensoc ne lanoiseforp nAicamrof nis neugla arap setnenamropimes olebac ed senoisnetxe odalatsni eH .odullebac oreuc led acrec olebac le arap setieca od etivE .elbisop rojem ol naev es euq arap saton sanugIA .etneugis osap la ayay y adajif nAisenetxe al eritor .abirra aicah otleus olep le euqorne .ohcefsitas jAtse is .satcer nos sadidnev atnic ed senoisnetxe sal ed aAroyam al .setnedicnic sarutxT A .azebac ut ed roderla roloc/nemulov ed sazeip ridaAa arap etneicifus euq sAm jAres euq ay .razepme arap setuqap sod oreiguS .ralles arap enoisery y .ortnec le ne olep ed art atipor us noc .aremirp al erbos etnematacaxe azeip arto al euqolo :5 osaP .zAar al edsed very bright, you might want to buy a glitter spray to spike over your own hair for the best pairing. I created this guide using my own recent hair extensions, which I selected for reasons: to combat my growing-out shaved side that's significantly shorter than the rest of my hair and add dimension to my bright hair color. And since saving money is the point of DIYing, it made the most sense to get an easy-to-find, inexpensive choice. Also, I intentionally didn't flat iron the extensions after they dried on a towel so they'd be more visible in the installation step images. Once you have the hair, remove it from the packaging, then follow these steps: Step 1: Part your hair where you'd like to place the first extension, which can be anywhere at least one inch from the top or sides of your head. Use a fine-tooth comb to release any bits of tape left behind, and wash thoroughly. DIYing tape-in extensions may seem daunting at first, but once you get the hang of it, the process is swift. Ariane Resnick/Design by Cristina Cianci When ready to remove your extensions, use a thick oil like coconut or an adhesive remover made for hair glue and tape. In my 20s, I dreadlocked my hair, for which I made extensions sewed in, and in my early 30s, I was a regular at micro-rings (human hair extensions shaped like tiny shoelaces that you thread with a bead through slivers of your own hair). Ariane Resnick/Design by Cristina Cianci With two packages of hair, you'll have enough for twenty sandwich pieces, sufficient to add significant volume and/or color. It can last for about a month, but some people keep them in for up to two. I dyed it myself with the same semi-permanent dye as my own hair. If you have a different curl pattern, wavy or straight hair, I recommend the straight ones and committing the duration to flat ironing; in my experience, that allows for the most natural look.
