Maybe, you can copy and paste the filenames and create a hyperlink for it one by one manually, but, this will waste much time if there are hundreds files in the folder. You should save the file as Excel Macro-Enabled Workbook format, if you want the formulas work well after the file is closed and reopened. [Navigate Between Worksheets By Using Drop Down List](#) Supposing, you have a workbook which contains multiple worksheets, now, you need to create a drop down list or combo box which lists all sheet names and when you select one sheet name from the drop down list, it will jump to that sheet immediately. Then, double click on a sheet's name in sheet list at the bottom. Copy Or Move Files From One Folder To Another Based On A List If you have a list of file names in a column in a worksheet, and the files locate in a folder in your computer. Get a list of all worksheet names from a workbook with VBA codeThe following two VBA codes can help you list all of the worksheet names in a new worksheet. After finishing the settings, then click OK. With the above formulas, the created sheet names are listed dynamically, when you change the sheet name in the workbook, the index sheet name will be updated automatically. =INDEX(ListSheets,A1) At once, the first sheet name will be input in Cell B1. Sometimes, you may be required to generate a list of all worksheet names in an Excel workbook. In the subsequent dialog box, enter "ListSheets" in the "Name" field. Next, press "Ctrl + C" to copy the name. Here we will share 3 simple methods with you. See screenshot: worksheet names with hyperlinks worksheet names with macro buttons Click to Download and free trial Kutools for Excel Now! More relative articles: List All Filenames In A Folder And Create Hyperlinks For Them For your daily work, you may need to import multiple filenames from a folder to a worksheet, and create hyperlinks for each files so that open the file quickly and easily. Then click OK > Close to close the dialog boxes, now, please go to a sheet where you want to list all the sheet names, and then enter the following formula into a blank cell: =IFERROR(INDEX(MID(Sheetnames,FIND("]",Sheetnames)+1,255),ROWS(\$A\$2:A2),"")Note: In the above formula, Sheetnames is the range name you are created in step 3.5. And then drag the fill handle down to the cells when blank cells are displayed, and now, all sheet names of current workbook have been listed as below screenshot shown:6. Click to Download and free trial Kutools for Excel Now! 3. Later, create a text file. For example, if you click the hyperlink text, it will locate the cell A1 of the sheet.7. Now, when you click the hyperlink text, it will take you to that sheet, see below demo:Notes: 1. Simply navigate to the menu, click, and the code will be inserted directly into your module. Hold down the ALT + F11 keys to open the Microsoft Visual Basic for Applications window.2. Click Insert > Module, and paste the following code in the Module Window.VBA: List all worksheet names with hyperlinks in a new worksheet:Sub CreateIndex() updateby Extendoffice Dim xAlerts As Boolean Dim i As Long Dim xShtIndex As Worksheet Dim xSht As Variant xAlerts = Application.DisplayAlerts Application.DisplayAlerts = False On Error Resume Next Sheets("Index").Delete On Error GoTo 0 Set xShtIndex = Sheets.Add(Sheets(1)) xShtIndex.Name = "Index" i = 1 Cells(1, 1).Value = "INDEX" For Each xSht In ThisWorkbook.Sheets If xSht.Name <> "Index" Then i = i + 1 xShtIndex.Hyperlinks.Add Cells(i, 1), "", "" & xSht.Name & "!A1", xSht.Name End If Next Application.DisplayAlerts = xAlerts End Sub2. All of the worksheet names have been listed with links in a new worksheet of the current workbook, Sheets("Sheet1").Range("A:A").ClearFor Each ws In Worksheets Sheets("Sheet1").Cells(x, 1) = ws.Name Stop searching for VBA code online. Click Kutools Plus > Worksheet > Create List of Sheet Names, see screenshot:2. Comparison Advantages Disadvantages Method 1 Easy to operate Too troublesome if there are a lot of worksheets Method 2 Easy to operate Demands you to type the index first Method 3 Quick and convenient Users should beware of the external malicious macros Easy even for VBA newbies Excel Gets Corrupted MS Excel is known to crash from time to time, thereby damaging the current files on saving. This could be handy for a quick list of every sheet in a workbook with many sheets. In the Create List of Sheet Names dialog box, please specify the following settings: (1.) Choose sheet index styles you like, you can create the worksheet names with hyperlinks or with macro buttons.(2.) Enter the worksheet names for sheet index.(3.) Specify the location of the worksheet index.(4.) Specify how much columns you want to use in the new worksheet to display the worksheet names. Then press F5 key to run the code, and all of the worksheet names in active workbook have been listed into a new worksheet called Index, and the sheet names are linked to each sheet as well, see screenshot: Get a list of all worksheet names from a workbook with a useful featureWith the Create List of Sheet Names utility of the third party add-in Kutools for Excel, you are able to create a list of worksheet names in one click, and link to each worksheet with hyperlink.Note:To apply this Create List of Sheet Names, firstly, you should download the Kutools for Excel, and then apply the feature quickly and easily.After installing Kutools for Excel, please do as this:1. Then, press "Ctrl + V" to paste the sheet name. Finally, just copy the formula down until you see the "#REF!" error. If there are only few sheets, you can just use the Method 1 to list the sheet names manually. Author Introduction: Shirley Zhang is a data recovery expert in DataNumen, Inc., which is the world leader in data recovery technologies, including sql fix and outlook repair software products. Method 3: List via Excel VBA Sub ListSheetNamesInNewWorkbook() Dim objNewWorkbook As Workbook Dim objNewWorksheet As Worksheet Set objNewWorkbook = Excel.Application.Workbooks.Add Set objNewWorksheet = objNewWorkbook.Sheets(1) For i = 1 To ThisWorkbook.Sheets.Count objNewWorksheet.Cells(i, 1) = i objNewWorksheet.Cells(i, 2) = ThisWorkbook.Sheets(i).Name Next i With objNewWorksheet.Rows(1).Insert.Cells(1, 1) = "INDEX" Cells(1, 1).Font.Bold = True Cells(1, 2) = "NAME" Cells(1, 2).Font.Bold = True Columns("A:B").AutoFit End With End Sub Later, press "F5" to run this macro right now. If you want to create the hyperlink for each sheet, please use the below formula: =HYPERLINK("#"&A2&"!A1","Go To Sheet")Note: In the above formula, A2 is the cell that contains the sheet name, and A1 is the cell where you want the active cell to be located. For more information visit www.datanumen.com Return to VBA Code Examples The following macro loops through every sheet in a workbook and writes the tab name of each sheet sequentially to a sheet you choose. 2. This article, I will introduce how to navigate between worksheets by using a drop down list in Excel. Make sure there isn't any important information on the output tab because it clears the data their before writing to it. Learn more about AutoMacro - A VBA Code Builder that allows beginners to code procedures from scratch with minimal coding knowledge and with many time-saving features for all users! Learn More! Easily access all of the code examples found on our site. (No installation required!) Free Download Return to VBA Code Examples Supposing, you have a workbook with multiple worksheets, now you want to list all of the sheet names in current workbook, is there any quick method for creating a list of these sheet names in Excel without typing them one by one? But, now, you need to move or copy these files which names are listed into the worksheet from their original folder to another one as following screenshot shown. Method 1: Get List Manually First off, open the specific Excel workbook. In Column A. In the popped out New Name dialog, specify a name into the Name text box, and then copy the below formula into the Refers to text box, see screenshot: =GET.WORKBOOK(1)&T(NOW())4. List all Worksheets in a Workbook To use the macro just replace the word Sheet1(it appears twice) in the code with the tab name where you would like the results. xlam add-in. Then, enter "1" in Cell A1 and "2" in Cell A2. If you have an Excel workbook that has hundreds of worksheets, and now you want to get a list of all the worksheet names, you can refer to this article. Now, in this way, you can copy each sheet's name to the text file one by one. How could you finish this task as quickly as you can in Excel? Later, put the following formula in Cell B1. Therefore, it's highly recommended to get hold of an external powerful Excel fix tool, such as DataNumen Outlook Repair. At once, a new Excel workbook will show up, in which you can see the list of worksheet names of the source Excel workbook. This tutorial is giving instructions on how to list worksheet names in Excel. In the Name Manager dialog box, click New button, see screenshot:3. Go to click Formula > Name Manager, see screenshot:2. Later, in the "Refers to" field, input the following formula: =REPLACE(GET.WORKBOOK(1),1,FIND("],GET.WORKBOOK(1)),"") After that, click "OK" and "Close" to save this formula. Please do as this:1. Get a list of all worksheet names from a workbook dynamically with formulasIn Excel, you can define a range name, and then apply a formula to list all sheet names from current workbook, please do with following steps:1. However, in the case that the Excel workbook contains a great number of worksheets, you had better use the latter 2 methods, which are much more efficient. Next, create a new worksheet in the current workbook. Method 2: List with Formula At the outset, turn to "Formulas" tab and click the "Name Manager" button. Next, in popup window, click "New". It's because that self-recovery feature in Excel is proven to fail frequently. Afterwards, select the two cells and drag them down to input 2,3,4,5, etc.

1. **Introduction**  
This document provides a comprehensive overview of the current state of the global economy, focusing on the challenges and opportunities presented by the COVID-19 pandemic. It examines the impact of the virus on various sectors, the role of governments in providing support, and the potential for a global recovery.

2. **Global Economic Outlook**  
The global economy has experienced a sharp decline since the onset of the pandemic in early 2020. Many countries have implemented lockdown measures to curb the spread of the virus, leading to a significant reduction in economic activity. However, there is a growing optimism that the world is beginning to see signs of recovery, with many countries starting to ease restrictions and resume normal operations.

3. **Impact of COVID-19**  
The COVID-19 pandemic has had a profound impact on the global economy. It has led to a global recession, with many countries experiencing a sharp decline in GDP. The pandemic has also disrupted supply chains, leading to shortages of goods and services. Additionally, it has highlighted the importance of public health and the need for governments to invest in healthcare infrastructure.

4. **Government Response**  
Governments around the world have implemented various measures to support their economies during the pandemic. These measures include fiscal stimulus packages, monetary easing, and direct financial aid to businesses and individuals. The effectiveness of these measures varies significantly between countries, depending on their economic structure and the timing of their interventions.

5. **Future Prospects**  
The future of the global economy remains uncertain. While there is a growing optimism that the world is beginning to see signs of recovery, there are still many challenges ahead. The pace of recovery is likely to be uneven, with some countries recovering more quickly than others. Additionally, the long-term impact of the pandemic on the global economy remains to be seen.
