Kekuatan Sebenarnya Adobe Lightroom lies in his ability to improve the color of the image of what GIOCO in Parole! A, if you are you Knowledge, the increase in color represents the atmosphere of the image. For example, you can use a darker color in your image to represent sadness or usual. But you can also edit your photos to have a living color that symbolizes happiness and enthusiasm. In Adobe Lightroom, you can do everything you want in terms of increasing color. You can even change the exposure, contrast, reflector and the most! "Everything with a simple cursor you can use in a short time. This is the real power of this revolutionary modification tool. Furthermore, Adobe Lightroom also provides an easy-to-use preset! You can apply this preset immediately to your photo if you are not You want to ruin control. This preset is loaded with the right settings you want your photo. It's a preset if you want a high contrast, a high contrast and detail and so on! A, think about it as a model you can use Every time you want to change quickly. They are more sophisticated than the simple filters because they don't just cover the colors with the colors. The presets make color correction for you! But if you can't find the preset you need, A Ch that you need to tamper the settings. What is more surprising in Adobe Lightroom is the fact that they implement useful tutorials during the application. Every time you use functionality, pop-up shapes appear. N some useful tips. They usually describe the features and what can be done for your image. A, this is very useful because you don't need to experiment or guess a lot. You already have a useful guide to help you create the photos you want. Sometimes, there are unwanted elements in our photo that makes it less attractive. In this case, we usually ignore it and take the other. But we discovered that the first was better because it was honest. Usually, when you want to eliminate something, use Adobe Photoshop. However, Adobe Lightroom is more than able to do it! With this function, you can delete almost all elements and replace it with something that is also in your photo. Other features of Adobe Lightroom are Adobe Sensei who use AI to automatically mark and manage your photos based on the element in it. This is useful if you don't have time to organize everything, if you want to find some photo, just look for "Cunung" and all your photos with the mountain it will appear. This can also be done for people! Adobe Lightroom also has features where you can easily create an album to invite others. Satisfy as Google Drive but only for photos! Finally, Adobe Lightroom does not eliminate the quality of your photos. In fact, it can even increase it! You can export any photo as high as possible so you can use it for business or personal problems. In the default version of the user you will get a number of ads each used, but not too often. Even if the announcement is not too much, but mostly the most disturbing people. Users must upgrade to the Premium version to delete it. The update process is certainly inseparable from the cost that must be removed and classified as rather expensive. But in this version of the user it was released from the announcement and it is not necessary to pay the payment costs. The use must be more effective and more comfortable. Most mode version software asks the user to run first on the root on the mobile system. But third-party software developers did not ask the user to work on the root before using it. The user is only the download and installing the ordinary, you can use the software. This is certainly more Because the root itself on each mobile is different and indirectly succeeded in a single way.
